SKILLS

- | | | | |
|--------------|--------------|--------------|----------------|
| • HTML | • Django | • MongoDB | • Jupyter |
| • CSS | • C# | • Angular | • Ubuntu |
| • JavaScript | • ASP.NET | • TypeScript | • Java |
| • jQuery | • Core | • Nginx | • Cloud |
| • AJAX | • MySQL | • Numpy | • computing |
| • Bootstrap | • Node.js | • Scipy | • Azure |
| • Python | • Express.js | • Matplotlib | • fundamentals |

PROJECTS

PHYS 434 at UW: Advanced Data Analysis Techniques for Large Datasets

(https://github.com/anthonybotello/PHYS_434)

- Portfolio-based data analysis course at UW utilizing Python, Jupyter Notebook to consolidate prose and code; Numpy and Pandas for data manipulation; SciPy for statistical distributions and mathematical operations on data; Matplotlib to visually present results.

Let's Eat (<https://le.anthonybotello.com/>)

- Full stack MEAN application deployed on Ubuntu 18.04 Azure Virtual Machine.
- Users can add new restaurants or review existing restaurants.
- Includes both backend and frontend validations for all forms.
- Technologies: JavaScript, TypeScript for writing front-end and back-end logic; Angular for front-end application functionality; Node.js, Express.js, MongoDB for interfacing between front-end and database; Bootstrap, HTML, CSS for front-end presentation, Nginx to serve application over Internet.

Product Manager (<https://pm.anthonybotello.com/>)

- Full stack MEAN application deployed on Ubuntu 18.04 Azure Virtual Machine.
- Users can add new restaurants or review existing restaurants.
- Includes both backend and frontend validations for all forms.
- Technologies: JavaScript, TypeScript for writing front-end and back-end logic; Angular for front-end application functionality; Node.js, Express.js, MongoDB for interfacing between front-end and database; Bootstrap, HTML, CSS for front-end presentation, Nginx to serve application over Internet.

Activity Center (<https://ac.anthonybotello.com/>)

- Full stack ASP.NET Core application deployed on Ubuntu 18.04 Azure Virtual Machine.
- Users can register/login to post, view, join, or edit activities.
- Includes backend validations for all forms.
- Technologies: C# for writing back-end logic; ASP.NET Core, Entity to build MVC application; MySQL for database; Bootstrap, HTML, CSS for front-end presentation, Nginx to serve application over Internet.

Handy Helper (<https://hh.anthonybotello.com/>)

- Full stack Django MTV application deployed on Ubuntu 18.04 Azure Virtual Machine.
- Users can register/login to post, view, add, or edit jobs.
- Includes backend validations for all forms.
- Technologies: Python for writing backend logic; Django for building MTV application; SQLite for database; Bootstrap, HTML, CSS for front-end presentation, Nginx to serve application over Internet.

Blackjack (<https://misc.anthonybotello.com/blackjack>)

- Simple game of blackjack.
- Technologies: JavaScript, jQuery for game logic; HTML, CSS, Bootstrap for front-end presentation.

Trivia (<https://misc.anthonybotello.com/trivia>)

- Simple game of trivia.
- Technologies: JavaScript, jQuery for game logic; AJAX for calls to API; HTML, CSS, Bootstrap for front-end presentation.

EXPERIENCE

University of Washington // March 2018 – June 2019

Undergraduate Research in Physics

- Undergraduate research in the principles of particle detector design as well as detector signatures and backgrounds.
- Utilized Python with Numpy, Scipy, Jupyter Notebook, Matplotlib, and Pandas to analyze large sets of particle collider event data.

Undergraduate Research in Chemistry

- Undergraduate research in electronic structure theory; utilized Gaussian software to approximate nonlinear optical properties of simple molecules.
- Utilized Mathematica to analyze large data sets of molecular orbital energy data.

United States Air Force Reserve // December 2011 – December 2017

Integrated Avionics Technician (AFSC: 2A852B)

- Provided maintenance support for missions flown by the C-5 aircraft of the 433rd Airlift Wing at Lackland AFB, TX.
- Provided maintenance support for missions flown by the C-17 aircraft of the 446th Airlift Wing at McChord AFB, WA.
- General aircraft maintenance including troubleshooting/maintenance of aviation electronics.
- Held SECRET security clearance, granted December 2011.

EDUCATION

University of Washington // 2017 – Present

Bachelor of Science, Physics (Graduating March 2020)

- Undergraduate-level course work in electromagnetism, classical mechanics, thermodynamics, particle and nuclear physics, mathematics, computer science; graduate-level course work in quantum chemistry, quantum mechanics, and group theory.
- Laboratory course work in electronic circuits, particle and nuclear physics, and computational methods.

Coding Dojo, Seattle // 2019

Graduate, September 2019

- Web fundamentals: HTML, CSS, and JavaScript.
- Full stack web development: Django, ASP.NET Core, MEAN.

Tacoma Community College // 2014 – 2017

Undergraduate, Transfer

- Transferred out in 2017.

Community College of the Air Force // 2012

Technical Training, Integrated Avionics

- Completed Electronics Principles apprentice course at Keesler AFB, MS.
- Completed Instrument and Flight Control Systems Avionics Fundamentals apprentice course at Sheppard AFB, TX.
